Amitriptyline-induced loss of tight junction integrity in a human endothelial–smooth muscle cell bi-layer model
K.L. Dahlin, K. Bohlin, J. Strindlund, Å. Ryrfeldt, I.A. Cotgreave (Sweden) 1–13
Amitriptyline causes loss of electrical resistance in the model

Effects of aging on resistance to *Trichinella spiralis* infection in rodents exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin
R.W. Luebke, C.B. Copeland, D.L. Andrews (USA) 15–26
Aged mice infestated with *Trichinella spiralis* are less sensitive to TCDD than young mice

Extracellular calcium is required for the polychlorinated biphenyl-induced increase of intracellular free calcium levels in cerebellar granule cell culture
W.R. Mundy, T.J. Shafer, H.A. Tilson, P.R.S. Kodavanti (USA) 27–39
***Ortho*-substituted PCBSs, but not non-*ortho*-substituted PCBs induce a long lasting increase of intracellular calcium**

Effects of a herbicide formulation, Tordon 75D®, and its individual components on the oxidative functions of mitochondria
D.J. Oakes, J.K. Pollak (Australia) 41–52
The constitutive surfactant polyglycol 26-2 is responsible for the observed effects

Toxicology Contents Alert 53–64

Instructions to Authors 65–66

Articles

Multivariate statistical analysis of organ weights in toxicity studies
H. Andersen, S. Larsen, H. Spliid, N.D. Christensen (Denmark) 67–77
The relation body weight/organ weight is important for targeted dosing

Distribution of γ-tubulin in multipolar spindles and multinucleated cells induced by dimethylarsinic acid, a methylated derivative of inorganic arsenics, in Chinese hamster V79 cells
T. Ochi, F. Nakajima, M. Nasui (Japan) 79–88
Centrosomes appear to be the primary target

A physiological model for ligand-induced accumulation of α_{2u} globulin in male rat kidney: Roles of protein synthesis and lysosomal degradation in the renal dosimetry of 2,4,4-trimethyl-2-pentanol
M.C. Kohn, R.L. Melnick (USA) 89–105
The model is matched against data

PCB congener 126-induced ultrastructural alterations in the rat liver: a stereological study
B.J. Connell, A. Singh, I. Chu (Canada) 107–115
In the hepatocytes of female rats, an incraese in mitochondrial and smooth endoplasmic reticulum volumes was measured
